

The Ancient Ones - January 30, 2022

We're right here in front of the Milk House. As Cristina, Maria Cristina, pointed out, we are in the house. And we are, we are in the house. And we're really, really glad to be with you today. We've got some interesting questions that's come in. And that's what this is all about, is those questions.

So Sananda here, so glad to be with you. And wow, you don't understand, maybe, the opportunity that you give us, in the end scene, to really blow socks off. Because you're in such a different place. And humanity's in such a different place. But some people, you know, think it's really dire and really scary. It is for some, but we in the unseen world are going: *oh, maybe now's the time, maybe now's the time.*

So I'm going to just begin with the first question that, if not the first pretty close to the one of the first ones that came in. And that was this: *you know, seeing the value that what we have shared through Sharon has brought into your life, how do I support her? How do I help her more?* Something along that line and a valuable, respectful question.

But we want to talk to you about that. It was eons ago, eons ago, that we met with amazing beings, you being part of the group. With another dire situation, another place of we could go over the edge energetically, our life force was being so sucked away. There were magnificent beings that stepped forward and said: *I'm I'm going to go for broke. I'm going to go with this next Mission. We're going to stop this.* So of course, I'm speaking of that seventh world where we had energetically so been sucked so dry of our energy, we would call it devolution. Some do call it devolution, falling in grace or falling from grace, or being stuck in duality. But we were so being sucked dry from those outsiders' agendas who didn't care, because they would just find another host. So we might be dry husks, but they didn't care. But of course, we cared. These are our families. These are us.

So the earth Mission proposed: *What was that? What was that all about?* Well, of course, it was about getting rid of the outsiders. If we had no way to get rid of the outsiders, we were a lost cause. And the problem was that

they owned us. At that level of love, wholeness, divinity, which is who we are, we had, through deception, opened our door. Because they said: *we know more, we've got better, let us show you, let's come into your families and show you better ways.* And of course, you have no conception of those who would dominate and take away our energy, we opened the door. And they came in. And from that point on, we were drained. We were handcuffed or beaten. We were, you know, we devolved energetically. And here we are in this Mission now.

So part of that power that you use, through what came in through Sharon, is knowing that that happened, but more importantly, the restoration of the authority voice and the awareness to use that authority voice to us beyond, because we're the ones who can make energetic changes at your request. And you all understand that.

4:54

So how do you support? It's not supporting Sharon. That's what I want to point out. It's not supporting Sharon, it's supporting the Mission we all committed to. So, how can you do that? Each of you, in absolute divine fashion, have a role to play. What is the outcome you want to hold for your time on the planet? What plan do you want to be involved with? And that's our plan. I mean, that's the plan we've been a part of from the beginning, as every soul on the planet has.

Now, we haven't been able to be fully involved for a very long time, because of the disruption, the disconnects, the co-opting of energy fields, within the body suits, within the psyche. So for so, so long, what we've been able to do is to help humanity survive. And so, we have this Mission, we have this commitment, that's who we are, to eliminating the outsiders, same as you. But for so many generations, lifetime upon lifetime, because of the crippling that had occurred in the body suit on the earth, within the psyche, through damage targeting et cetera of female and male; when those who allow our voices to come through them, all we could say, is: *remember, you are love. Remember you are love. Fill yourself with love.* We had to because they had no authority. If we told them to stand up and say to outside or type energies when they were crippled: *you can't be here,* they would and had been destroyed.

So for a long, long time, if those we could speak through, were asked: *how can we participate in life?* We had to say: *share love.* Because we were in survival mode. And we still, in most places, are only able to say: *remember, you are whole, remember, all there is, is love.* That's all we can say. Because it's still, they're still, in survival mode. It kept their hope alive, that it kept

their their faith in each other alive.

So what we're so excited about in speaking to you, is that we can say through Sharon to you: *hey, there's outsiders there, there's outsiders there.* You're the ones who can speak the declaration and say: *I see you, I name you.* And then we can move them back to their home of origin. And that's new for humanity. It's new for us, but it was part of the original plan. So how do you participate? That's what you're participating in, or at least you're invited to participate in, and I think most of you are, but I'm not going to assume that you're participating in. This awareness that by your word, you can identify any energy that someone says: oh, that's a bad energy, or they're they're gonna hurt you, or anything like that, that you know or hear or sense of - you know exactly what to do. Go within. Connect. Inwardly, we hear you at every moment in time.

9:44

To be able to say: *Remove them. Deep Six. Remove them.* It takes that message level: *hey, there's something wrong in the planet,* it takes that message-giver level, to a whole different blast, if you will. Blast. Because up until now, for most of the time on the planet, once the body suit was crippled, once the female psyche was crushed, if anybody said: *hey, there's a problem here,* it had to be. There's a problem here: *we know, let's be small.* That's how we've had to work. Not because there wasn't more that could be done.

But we have to meet a consciousness, we have to meet that person in the body suit, at the level they are. And if they're still in the mentality that they don't have the power, then we can't show them where they do have the power until they ask: *what's wrong? what more?* Which is what Sharon did. She didn't say: *How can I help my clients feel better about themselves?* That's not what she said. She said: *I see the cycles of repeating pain, repeating pain, repeating pain, with a little bit of let's take the edge off, let's take the edge off, let's take the edge off, but it's never stopped.* And so she asked us: *What is the cause? What is the cause of the cycling? Where did it begin? You see?*

Now, by law, we can say: *oh, good, you ask, we'll show you.* And we showed her that galactic worlds, those eight worlds where the problem began. That Law of Ask and Receive is really important for you to understand. You have the authority, you're the master of your your boat, if you will. And most people's boats are running from the unconscious, with unconscious rudders. And they don't understand the Law, therefore they don't use the Law. And then they feel victimized, or they blame, or they wait for somebody else to make

the change, or they hope the elected officials will be a magic key, you see?

We have seen how the power of our families on this planet, in this Mission, has have been ripped away, piece by piece by piece by piece by piece from those who would do good. And yet those same Laws been used extensively by those who are committed to control. So you participate every day. Claim, claim again, you're part of this bigger Mission, whatever that outcome you see for the Mission. You know, I think just being here says: *I want a world that's reflective of our divine agendas. I want a world in which there's peace and respect and unity amongst diversity.* You know, you've done it. How do you play in it? That's what you're supporting, is that.

14:00

Which brings me to the next person who wants to speak, a genius on the planet, Tesla. He was a great example of being open to what would be benefiting humanity, and getting that information, and bringing it into form.

My commitment, my commitment, was was to make humanity beneficial to everybody. And I and I knew that what I was receiving would do it, because I saw it doing it. I saw the visions. I didn't make these up. I didn't take equations and say, well, they work. I saw what worked and made equations. I saw what worked and made designs. I brought it into form. Because my commitment was: *how can we benefit humanity* and the way I did it was mainly through energy, electricity.

And during that time, I lived in a bodysuit. I got to experience the great power arrayed to prevent the benefit to all from happening. So, for me, seeing what is being done here in this group, that's why we partner with you. That's why I partner with you. As part of that team, I can help bring in ideas, I can help send ideas, I can bring together geniuses. And will and have, because you have the awareness of not only keeping us safe, keeping yourself safe, that's not all you do. You go like: *okay, come at me, come on, let him come, because I will stand in what Sharon calls the Sofia center sort, to say, gone, gone, gone, gone, gone.*

And I didn't have that, I didn't have that when I was in a physical body suit, and I was crushed. And many of my visions, inventions, if you will, were crashed, or hidden, or not many, but some, may be brought forth, but not as I had intended them to be. So, I just want to affirm that you are different. You are different. And I think you do not understand the great power that has been and will be arrayed against bringing benefit.

Those of the, what Sharon terms outsiders, they understand the law. They

understand the law. So, those who are swaying the thoughts of the creators in an organization, those who set the tone in the organization at the top, if you have a leader who is of mentality and of the agenda of control and competition and more money, more money, more money and greed, which is certainly out there. The work that is done in the organization, all the effort, all the working, all the talking, feeds the fire of greed, feeds the fire of control, you see.

So when someone says how many times should I do a reality shift? Well, if you want to be in competition, or at least up like those who are using the same laws to destroy, you might be doing it for three or four hours a day. You see, I mean, you understand, you have the same law. You have the same law, how do you want to use it? You can focus and be with us and strengthen the new creation, which is where we're at, bringing in something never happening before. So what if it takes you two hours a day, four days a week.

19:51

Those in the workforce are working eight hours a day, 10 hours a day, five days a week. And a lot of it is tainted with the energy of outsiders? Just a thought. Just a thought.

Which brings me to one of the other questions that came in and that is: *what do you think about the AI Artificial Intelligence?* What's new on the planet? Are there outsiders involved? Of course they are. Is there alternative? Or is there agendas underneath the idea that would use that concept to entrap, destroy, get rid of human body suits even? Oh, yeah, of course. What is new? What is new? They've been doing this, since the beginning of the third world. They've been: *what do we do, what do we do? We want total use of the energy and if we can get rid of physical bodies, physical consciousnesses, and just use the energy.* Of course they would do it. That's a given. That's why we're on the planet is to see the forms they make.

Isn't that interesting? When I look at the artificial intelligence and what support it has, and how it's risen to the top and how it's got this huge block force behind it, right. And then I look back in my lifetime, I could have harnessed the power in the air. The power in the air to provide all electrical needs for everybody for free. That idea was crushed. You see what I'm saying? So it's not of these ideas - are they of outsiders? Of course, they all are. Co-opted, it might have a kernel of lovely, wonderful. Is it co-opted by outsiders? Always, always, always, as long as they run the planet. Yes.

What do you do about it, is the question. And for most people, all they can

do is run from it, scream about it, be sad about it, feel powerless about it. That's all they can do. And hopefully, stay enough focused on: *I'm love, I'm love, I'm love* to survive. But you guys, you guys know more, more. That's why it's so exciting to be part of what you're doing. And part of you, you know what to do. Put that whole concept in that bubble you call Guardian Circle. And what we are also been asked you to do is bring in that laser steward energy of outsider residue, put them in that bubble, that whole concept. Is there some good stuff in that concept? Oh, yeah. But what we want to blast away and move away is outsider energy and residue. So you blast away at those things.

And what if you do 30 minutes a day, in the morning, 30 minutes at night, 30 minutes in the morning, 30 at night. They are working eight hours a day, five days a week? You don't have to do that. Because when you connect with us, we can amplify your voice and move in. So how can you support? Hey, it's the idea, it's the concept. Where do we want to be? And then where do you want to play? Where do you want to play it in? That's what you say: *I'm playing in this game? And we're upping the ante. And I want it to absolutely feed me as I do the work. It's not going to deplete me. I'm going to be so excited.* And what do you do with things like artificial intelligence, or taking down Roe v Wade for ownership of female body suits? You up the ante of what you know and you go after the cause. Because you have the authority restored to you to go after the cause. And if you want to know more: *hey, that's I want to do, do it in a different way. I want to do it more powerfully.* Ask the question: *how can I? show me how to, you see?*

24:57

I bet none of you have thought this a question, I'm going to put on the hopper. I bet none of you have asked the question: *how was Sharon able to bring in the authority, to restore the authority?* Because she is a member of the curiosity group, of the divine family of curiosity. She was owned, her energy was owned. Her psyche was crippled, her bodysuit was crippled. How did she get beyond that? I'm gonna leave you with that question.

Why do you have the authority? How did she have the authority? What is different about it? But all I know to tell you is, this is an exciting time. And we're able to share with you in ways we can't share with other groups, we have to share at the level you're at. And if individuals, just all they can do is hold on to their love, and they're basically good, perfect. They will keep that stream alive. But you're here to totally change the game. Totally change the game, and oh my gosh, I wish I had had you when I was on the planet. We would have changed the world. So now we get the opportunity to do that. And there are many here waiting to work with you. So don't be surprised if a

name comes to your mind, and you go like what, who, me? There are those who have been holding inventions, geniuses, creative, networking, they've been holding those things in abeyance until a time when they could really be brought in to form. You may be the very one to bring something into form. I'm sure you are.

27:01

So I am honored. I am honored and with that, I was just was checking to see if Sananda wanted to take over and say goodbye. But he's saying no. I did it okay. I will be the last place today. So Blessings to you all. Next time exciting thing we're into. And we love you so much. Great hopes, many plans, and make sure that you set the criteria that it brings you joy and it brings you vitality. Because it's not about surviving anymore. It's about joyfully being in Mission and laughing with each other. So I love you, we love you. And until we meet again. Much love.
